

### High-quality image description

- ◆ The image circle of the lens has been optimized for K-mount interchangeable-lens digital cameras
- ◆ Effectively compensate astigmatism for sharp, clear images.
- ◆ Thanks to its large F1.8 maximum aperture, the lens can easily produce images with a very shallow depth of field.

### Easy-to-handle medium-telephoto lens

- ◆ Focal length of approximately 76.5mm in the 35mm format
- ◆ Demonstrates exceptional image descriptive power and an image rendition unique to this lens.
- ◆ Offering a moderate-telephoto perspective perfect for portraiture with a smooth, beautiful *bokeh* effect in the background and snapshots cropping a part of the subject.

### SP coating to block dirt and dust

- ◆ The front surface of this lens is treated with SP (Super Protect) coating, which applies an exclusive fluorine compound to the lens surface through a vapor deposition process.
- ◆ This SP coating not only repels dust, water and grease, but also makes it easy to wipe off oily stains such as fingerprints and cosmetics.

<b>Lens Mount</b>	PENTAX KAF Mount
<b>Focal Length</b>	50mm (Equ. to 76.5mm in 35mm format)
