Compatible Lens	SEL70200GM, SEL100400GM

Size & Weight

Dimensions (W x H x D)	62.4 x 42.7 mm
Weight	207 g

Features

Double your focal length

Multiplies the focal length of the lens used by 2x without degrading optical performance, AF speed and precision, or operability. Light loss with the teleconverter is approximately 2 stops. An ideal way to extend available focal length range for sports or wildlife photography without having to carry additional large, heavy lenses.

Compatible lenses

The SEL20TC teleconverter is compatible with the following lenses: SEL70200GM, SEL100400GM

Optional Accessories

ALC-R1EM

Protect your camera's rear glass

ALC-B1EM

Protect your camera body from dirt and dust
